

Disk Accelerator Pro™

The Fast & Easy Way to Speed up Your PC – Automatically!

DESCRIPTION

The more you use your PC, the more likely that files are residing in the farthest reaches of your hard disk's surface, leading to extremely long load times, slower overall performance, even random crashes and freezes. As those files grow in number and size, Windows has to scout out available space, often writing those files in hundreds or even thousands of segments, all in different places on your hard disk.

SPEED UP YOUR PC!

Disk Accelerator Pro's total defragmentation technology will restore your hard disk to its maximum possible performance. It includes everything you need to optimize your hard disk's performance – and to keep it that way.

You'll enjoy potentially significant performance increases with Disk Accelerator Pro™ – regardless of the size of your drive, the number of partitions, or your drive interface. Disk Accelerator Pro even optimizes RAID systems.

Disk Accelerator Pro optimizes your PC at high speed using its exclusive technology.

For total hard disk defragmentation there is simply no better choice.

FEATURES

- Automatically defragment your hard drive with OneButtonDefrag
- Easy defragmentation of all Windows-supported drives, including RAID systems
- Defragmentation of memory cards and removable media USB sticks
- Screen Saver Mode automatically defragments while your computer is idle.
- Simultaneously defragments multiple drives
- Power management for notebooks
- Optional background defragmentation
- And much more!

SPECIAL FREE BONUS! FILE RESTORE DELUXE™

This easy-to-use utility can be a lifesaver when you need it most. It lets you find and restore lost files with the click of a button. File Restore Deluxe even restores the original file name and directory structure as though nothing had been deleted in the first place.

Got a digital camera? File Restore Deluxe will even recover photos on most memory cards, as well as files on external hard drives and USB sticks.

SYSTEM REQUIREMENTS

Windows XP, 2000 or NT 4.0; Pentium 200 Mhz or equivalent; 64 MB RAM; CD-ROM drive.
